## Versioni

Ver	Data	Redattore	Verificatore	descrizione
0.1	05/11/2024	Gabriele Di Pietro	Filippo Rizzolo	Prima stesura del documento

This document is incomplete. The external file associated with the glossary 'main' (which should be called `glossario.gls`) hasn't been created.

Check the contents of the file `glossario.glo`. If it's empty, that means you haven't indexed any of your entries in this glossary (using commands like `\gls` or `\glsadd`) so this list can't be generated. If the file isn't empty, the document build process hasn't been completed.

You may need to rerun  $\LaTeX$ . If you already have, it may be that  $\TeX$ 's shell escape doesn't allow you to run `makeindex`. Check the transcript file `glossario.log`. If the shell escape is disabled, try one of the following:

- Run the external (Lua) application:

```
makeglossaries-lite "glossario"
```

- Run the external (Perl) application:

```
makeglossaries "glossario"
```

Then rerun  $\LaTeX$  on this document.

This message will be removed once the problem has been fixed.
